

Eyelash Extensions Aftercare Instructions

It takes 48 hours for the adhesive to cure (dry) thoroughly and yield a strong, durable bond. During this time, the adhesive bond is vulnerable to moisture, steam, excessive heat, cosmetic ingredients coming into contact with the adhesive bond, and friction from rubbing and cleansing.

During the first 48 hours please AVOID:

- Showering or wetting your eyelashes
- Exposure to heat, steam, sauna and friction
- Application of eye and eyelash cosmetics
- Sleeping on side or stomach
- Receiving chemical treatments, such as eyelash tinting or perming
- Receiving irritating eye-area treatments, such as strong chemical peels, skin-resurfacing procedures, eyebrow waxing or laser treatments.

After the first 48 hours please AVOID:

- Excessive exposure to heat, steam, sauna and friction
- Use of oil-based eye care products on or near your eyelashes, such as eye creams, eye serums, Vaseline and cleansers
- Use of waterproof cosmetic products on or near the lashes, including waterproof mascara and eyeliner
- Excessive mascara application
- Use of mechanical curlers
- Picking or pulling on your eyelashes
- Excessively rubbing your eyes

Proper care and maintenance of your new lashes will ensure beautiful and long-lasting results. Extensions are semi-permanent and will last indefinitely with fills every 2 to 4 weeks.
